

2014 JFSP Funding Opportunity Notice is Now Closed

The Joint Fire Science Program received 200 proposals for our 2014 funding solicitation. This is an increase of 84 proposals from the 2013 solicitation. Following is the number of proposals for each task statement:

Proposals Submitted	Task Number	Task Title
21	14-1-01	Fuels treatment effectiveness across landscapes
21	14-1-02	Influence of past wildfires on wildland fire behavior, effects and management
15	14-1-03	Contribution of smoke emissions to secondary organic aerosols
15	14-1-04	The effects of smoke from wildland fires on human health in urban centers
17	14-1-05	Compatibility of fire and fuel treatments with threatened and endangered bats
31	14-1-06	Effects of wildfire on water
9	14-1-07	Fire weather data resolution
31	14-2-01	New science initiative – social science
38	14-3-01	Graduate research innovation (GRIN) award
2	14-4-01	Knowledge exchange consortia pre-proposals

Pre-proposals were received for both the Mid-Atlantic/New England consortium and the policy consortium. There were an additional 19 proposals started, but not submitted. Peer review panels will meet in January and February and make recommendations to the JFSP Governing Board.
